

Lewis Barclay, Curriculum Vitae

Technical lead & web / javascript developer

Reigate, Surrey

Email : me@lewisbarclay.com

Background

Lewis has been a contract tech lead or senior developer in teams building software, web apps and websites since 1999. Since 2008 he has focused on UI development in scrum teams, with a focus on UX and cross device development. Lewis is a client facing tech lead with excellent verbal and written communication skills, he has extensive experience in object orientated programming and a creative flair. Lewis is equally happy coding, working with UX and design teams or working as part of a business or strategy focused technical team.

Award winning sites, recently developed

[Grundini](http://www.grundini.com) (<http://www.grundini.com>)

All front-end and back-end development (Javascript and NodeJs) and technical direction to the UX team. Overall winner of two categories for the digital marketing design awards 2012.

[Green Park](http://www.greenpark.co.uk) (<http://www.greenpark.co.uk>)

Some front end development and back-end integration (Javascript and ASP.Net) and tech lead and technical assistance to the UX team. Winner of a digital impact award 2013.

Experience.

All contract unless otherwise stated

UI developer & UI Tech lead - Aimia, e-commerce. London

November 2012 - Present

(Java, Scrum environment) Javascript (OO), LESS / CSS, HTML5, Backbone, Marionette, responsive design, adaptive design, Grunt, jQuery, NodeJs, Jasmine, Rest, Git, JSON, TDD, BDD, CI, Photoshop

Lewis works in a UI team of six developers building four user interfaces; call centre, config UI, campaign management UI and a white label public facing site, as part of an enterprise loyalty e-commerce application.

As Tech lead Lewis represented the UI team in senior tech meetings for 'Backlog grooming' and liaised with the PO team, lead designer and other tech teams.

All code was developed as part of a CI environment with developers expected to write unit test and integration tests.

Tech lead - Further, creative agency. London

July 2011 - November 2012

HTML5, Javascript, LESS / CSS, responsive design, adaptive design, Grunt, jQuery, NodeJs, ASP.Net, C#, Wordpress, Photoshop

Technical planning, strategy, design, architecture and development were Lewis's responsibility. Lewis advised the business on a preferred technical approach to development, hosting and technical architecture, on a project by project basis. Lewis also proposed ways to utilise existing technology to offer clients a better ROI, save the business money and generate profit. Lewis helped with the technical side of all digital creative offerings while at Further and helped with recruitment of freelance technical staff.

MCP certified, 2003, Developing and Implementing Web Applications with Microsoft Visual C# .NET and Microsoft Visual Studio.NET (315)

Recommendations:

“Lewis came to Further for three months and stayed for a year and a half.

He understood Further’s particular situation well and was able to lead projects from a technical point of view, while being hands on and writing code on a wide variety of projects. He has a great desire to create beautiful things and challenge old ways of doing it along the way. Lewis is in his element when he’s up to his eyeballs in lines of JavaScript but tear him away from his screen and you’ll find a great personality too.

Hopefully I’ll get the chance to work with him again one day”

- Ben Clarke, (Former) Digital Director, Further

“Lewis is a brilliant Tech Manager with exceptional technical knowledge and is a brilliant addition to any team. He has a hands-on attitude and is always up for getting stuck in and putting in extra time, when required. He was really fun to work with and I hope we can work together again.”

- Heather Ellis, (Former) Producer, Marvellous
